## Key Benefits

### Fast Implementation

Mobile POTS can be setup and running in as little as one day.

### Cost Savings

MetTel's flat rate eliminates surprise fees and surcharges with our low price your business will enjoy significant savings on your monthly bill.

### No Wires Required

No complicated wiring is involved. Mobile POTS is easy to install and even easier for your business to maintain with no broadband or dial-up connection required.

### More Up Time

Not having to rely on the existing infrastructure and constant repairs experienced by regular landline solutions means your phone service will not have to deal with unexpected outages or downtime.
