

Cloud Connect

Seamlessly Secure your Path to the Cloud

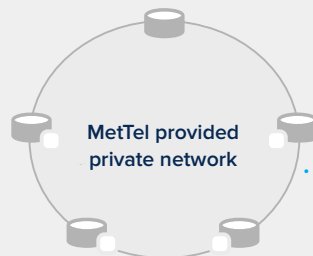

MetTel's Cloud Connect service helps protect sensitive data by routing your network traffic through a private connection directly to your cloud provider. This private link allows your organization to enjoy easy, safe and fast access to the cloud, while maximizing performance and reducing latency.

By 2018, the 60% of enterprises that implement appropriate cloud visibility and control tools will experience one-third fewer security failures.

– Gartner, 2016

Features

- Enterprise-grade network security, performance and availability
- Added control for management simplicity
- Increased agility for IT services delivery
- Reduced capital outlay
- Regulated access to critical data
- Integrated and high speed routing
- Seamless access to leading cloud providers

Key Benefits

Cost Savings

Pricing includes unlimited data transfer. Additionally, reduced rates from cloud providers like AWS are available.

Security & Privacy

A secure connection between your network and the cloud protects your enterprise by eliminating private data being routed over the public Internet.

Easy Setup

No additional equipment or access lines are needed.

Improved Performance

Cloud Connect provides faster access to cloud providers, up to 50% lower latency and more consistent network performance.
