

Push-to-Talk

Eliminate wireless dead zones and get coverage where you need it with Push-to-Talk (PTT). MetTel's enhanced PTT can be added to any device, phone or tablet regardless of operating system so that you can connect to your employees in an instant. MetTel's PTT solution drastically improves connectivity and work efficiency for any company with large mobile work forces.

Features

- Communicate quickly and easily with coworkers using 4G or over Wi-Fi
- Talk with large groups up to 250 people
- Compatible with a large variety of devices
- Record conversations, events, and locations from single location
- Share information and make calls securely with enterprise-grade encryption

Key Benefits

- This is not your father's Push to Talk! Enhanced Push-to-Talk with Integrated Dispatch helps businesses speed up and better manage communications with employees in the field.
- The low cost, Wi-Fi compatible service can be added to customers' existing mobile devices and is a great and cost effective alternative to keeping your workforce connected
- With an integrated dispatch screen, you can communicate with your entire workforce, as well as see their whereabouts live, on Google maps.
- Compatible with both purpose specific PTT mobile devices, as well as with any smartphone or tablet. No need to carry multiple devices.
