

Digital Voice

Did you know that your underlying carrier is increasing your landline rates by an average of **10% annually**?

Keep rates steady with a digital connection.

Digital Voice upgrades business facilities by migrating existing analog lines onto an advanced network at no additional charge. MetTel provides and manages complimentary equipment so that customers' existing services continue to function without any noticeable change. Standard telephone signals are converted to digital signals using existing PBX equipment, telephones, software and network infrastructure.
